To run application you have to use url http://localhost:8080/

There you can press any of the four buttons (four exercises) to execute them.
Default value is 55, to change it, change the last number in url from 55 to another.
For example http://localhost:8080/ex4/55 to http://localhost:8080/ex4/2

You can also use url at the beginning.

If you will enter letter instead of numbers in the url, the result will be calculated for number 0.
